PostgreSQL	TailwindCSS	HTML & CSS	REST APIs

Virtual Assistance & Admin

Email & Calendar Management	CRM (HubSpot)	Data Entry	Online Research
Lead Generation	Google Workspace	Microsoft Office	Canva
Zapier	Trello	Asana	Notion

Digital Training & Operations

Curriculum Design	Training Facilitation	Course Launch Ops	SOPs & Documentation
Student Onboarding	Agile Methodology	Git & GitHub	Role-Based Access Control
Offline-First Architecture	QR Traceability	ClickUp	Make / Gumloop

PROFESSIONAL EXPERIENCE

Digital Skills Trainer

KingsWay Rehabilitation Centre | Kampala, Uganda | 2026 (2 Months)

- Designed and delivered a 4-session digital literacy training programme for male and female participants aged 23–43, covering digital basics, AI tools, mental health technology, freelancing, and online income generation.
- Adapted teaching methods and materials to suit diverse learning backgrounds, ensuring all participants engaged confidently with technology by end of programme.
- Produced a complete learner handout, slide decks, session activities, and homework assignments as training support materials.
- Tracked participant progress, maintained attendance records, and submitted session reports to centre administration.

Virtual Assistant — Practical Training & Project Experience

TechCrush Bootcamp | Remote | December 2025 – February 2026

- Managed email inboxes, scheduled meetings, and coordinated tasks for executives — improving productivity and response time in remote work environments.

- Conducted online research, generated B2B leads using LinkedIn and ContactOut, and compiled structured reports and databases.
- Managed CRM data entry and client record updates ensuring accuracy and consistency across contact databases.
- Designed professional presentations, marketing materials, and business documents using Canva and Google Slides.
- Automated workflows using Zapier to reduce manual tasks and improve team operational efficiency.
- Coordinated tasks and deadlines using Trello, Asana, Notion, and ClickUp across concurrent projects.

Software Engineering Apprentice

Rugyeo Farm Uganda | Kampala, Uganda | June 2025 – December 2025

- Led development of a Farm Management & Information System enabling end-to-end digital traceability from field production to trading, serving as Technical Lead across all sprints.
- Designed and implemented a mobile-first field application and web dashboard using React Native, Django, and PostgreSQL — deployed in a live operational environment.
- Implemented QR-based lot and batch traceability with offline-first data capture and automatic sync functionality for areas with limited connectivity.
- Built task management, inventory, and procurement modules that improved team operational efficiency across farm departments.
- Designed secure authentication and role-based access control to protect sensitive farm data.
- Collaborated with a cross-functional team of 7 developers and stakeholders using Agile and Lean Development methodologies.

KEY PROJECTS

Ed-Tech Course Launch Operations — Capstone Project, Group 8

Learni-fied | AI-Powered Business Scaling Blueprint (Dr. Mayer) | 2025

- Served on the Customer Support & Enrolment Team for an 8-week premium hybrid course launch targeting 200+ student enrolments.
- Drafted 5 professional email support templates covering payment issues, course access, welcome messages, and deadline reminders.
- Created a comprehensive 15-question Student FAQ document to reduce repetitive support queries and improve self-service.
- Built a Google Sheets inquiry tracker to monitor student issues, resolution status, and follow-up actions.
- Developed Standard Operating Procedures (SOPs) for Email Setup, Enrolment Process, and Support Ticket Handling.
- Contributed to a master project tracker in Trello/Asana and co-authored a daily progress report format across teams.

Farm Management & Information System — Project 2

Tech Stack: React.js, Node.js, Express, React Native, TailwindCSS, Django REST API, PostgreSQL, GitHub, Trello | 2025

- Developed role-based dashboards for Block Champions, Managers, and Admins to monitor KPIs, tasks, and reports in real time.
- Implemented offline-first mobile features for field data collection with auto-sync when connectivity is restored.
- Designed secure authentication and role-based access control to protect sensitive operational data.

Content Management System & Coffee Farming Knowledge Hub — Project 1

Tech Stack: Python, Django, Strapi, React.js, PostgreSQL | 2025

- Built a full content management system and public knowledge hub about coffee farming, combining editorial content with booking and event management functionality.
- Contributed Farm Tour Booking, Knowledge Hub, and Event Management modules — managing end-to-end user flows from registration to participation.

EDUCATION & CERTIFICATIONS

Advanced Certificate in Software Engineering

Refractory Academy | June 2025 – January 2026

Certificate in Software Engineering with JavaScript

Refractory Academy | January 2025 – May 2025

Uganda Advanced Certificate in Education

Mother Kevin Secondary School, Jinja

Certificate in Virtual Assistance

TechCrush Bootcamp | December 2025 – February 2026

Certificate in Climate Change Learning for Action

Terra.do School | October 2025 – January 2026
